EDUCATION

University of Virginia

BS Computer Science

Charlottesville, VA

Expected May 2027

- **Relevant Coursework:** Software Development Essentials (Java, Gradle, JDBC, Hibernate), Data Structures & Algorithms II, Machine Learning, Database Systems, Probability, Intro to Cybersecurity
- **Prior:** Artificial Intelligence, Data Science with R, Software Engineering (Django, Heroku, AWS)

Northern Virginia Community College

AS Engineering

Annandale, VA

May 2025

- **Relevant Coursework:** Object-Oriented Programming, Data Structures & Algorithms, Calculus I–III, Linear Algebra, Discrete Mathematics

TECHNICAL SKILLS

Languages: Java, Python, C++, JavaScript, SQL, R **Technologies:** Git, JDBC, Hibernate, Gradle, SQLite, PostgreSQL, JavaFX, Docker, Linux, Django, Heroku, AWS, React

Certifications: AWS Cloud Practitioner

PROJECTS

Retail ERP Deployment | *Odoo, Docker, PostgreSQL, Linux*

2026

- Deployed and self-hosted Odoo 18 Community ERP on a Linux VPS to replace a family retail business's legacy Monica 9 system, running the stack in Docker behind a Cloudflare Tunnel for secure remote access
- Migrated 500+ active products from the legacy system into PostgreSQL using a structured Excel-to-Odoo import mapping, preserving pricing, stock levels, and supplier data
- Configured point-of-sale, multi-location inventory, cash control, and tiered pricelists with role-based user permissions to match existing store workflows for a pilot handling 500+ daily transactions

TSA Helper | *Django, PostgreSQL, AWS S3, Heroku*

Spring 2026

- Owned deployment and DevOps on a 5-person Agile team, shipping a Django student-organization platform (tasks, finance, documents, messaging) to Heroku with Unicorn, WhiteNoise, and PostgreSQL
- Configured AWS S3 storage through django-storages for user-uploaded documents and profile photos in the production environment
- Built a Discord-style multi-channel messaging feature with emoji reactions, reply threading, pinned messages, and live autoscroll using Django templates, JavaScript, and custom models

Course Review CRUD App | *Java, JavaFX, SQLite, JDBC*

Fall 2025

- Built full-stack JavaFX application enabling students to create, read, update, and delete course reviews with user authentication and persistent SQLite data storage
- Designed relational database schema using JDBC with proper foreign key constraints and data integrity
- Collaborated in a team of 3 using Git, implementing secure password hashing and input validation to prevent SQL injection

EXPERIENCE

Produce Associate

Costco Wholesale

Sep 2024 – Jul 2025

Sterling, VA

- Collaborated in a fast-paced team environment while maintaining full-time coursework, demonstrating strong time management
- Utilized AS/400 mainframe system for inventory tracking and sales analysis, gaining exposure to legacy enterprise systems

Restaurant Server

Great American Restaurants

Aug 2023 – Feb 2024

Sterling, VA

- Coordinated with a cross-functional team in a high-pressure environment serving 100+ guests per shift
- Developed problem-solving and communication skills managing customer needs across diverse backgrounds

ADDITIONAL INFORMATION

Languages: Fluent in English and Spanish; studying Japanese and Korean
