EDUCATION

University of Virginia

BS Computer Science

Charlottesville, VA

Expected May 2027

- **Coursework:** Machine Learning, Database Systems, Data Structures & Algorithms II, Software Development Essentials, Artificial Intelligence, Discrete Math & Theory, Cybersecurity, Software Engineering

Northern Virginia Community College

AS Engineering

Annandale, VA

May 2025

TECHNICAL SKILLS

Languages: C++, Java, Python, TypeScript/JavaScript, SQL, R

Technologies: Git, Linux, Docker, PostgreSQL, Prisma, JDBC, Hibernate, Next.js, React, Django, FastAPI, Astro, Tailwind, LLM APIs (Gemini), AWS, Vercel, Cloudflare

Certifications: AWS Certified Cloud Practitioner **Spoken:** English, Spanish (fluent)

EXPERIENCE

Loudoun Nature Conservation Project

Technical Lead, Web & Infrastructure (Volunteer)

Remote

Jul 2026 – Present

- Rebuilt a managed WordPress site as a statically generated Astro + Tailwind CSS site on Cloudflare Pages, reducing recurring hosting cost from \$178/year to roughly \$12/year for a 501(c)(3) nonprofit
- Migrated hosting, DNS, and domain registration from Bluehost to Cloudflare with zero downtime, consolidating registrar, DNS, and CDN under a single provider
- Integrated Keystatic, a Git-based CMS storing content as YAML, so non-technical staff edit pages in-browser while every change stays version-controlled; own search/analytics and authored stack documentation for volunteer handoff

Costco Wholesale

Produce Associate

Sterling, VA

Sep 2024 – Jul 2025

- Operated AS/400 mainframe workflows for inventory tracking and sales analysis in a legacy enterprise environment

PROJECTS

hejoric.com — Portfolio & Consistency Tracker | *Next.js, TypeScript, Prisma, Postgres* 2026

- Built and deployed a full-stack Next.js 14 (App Router) application in TypeScript on Vercel, backed by Prisma ORM over serverless Postgres (Neon) with pooled and direct connections for runtime and migrations
- Implemented GitHub OAuth with NextAuth v5 gating an admin dashboard, plus REST API routes for logging activity and publishing projects
- Designed a GitHub-style contribution heatmap rendering 52 weeks of multi-domain activity data, and an MDX blog pipeline with server-side syntax highlighting

Retail ERP Deployment | *Odoo, Python, Docker, PostgreSQL, Linux* 2026

- Developed custom Odoo modules in Python by reading upstream source and mapping the ORM's PostgreSQL schema, extending inventory and pricing models beyond stock functionality
- Deployed and self-hosted Odoo 18 Community on a Linux VPS to replace a retail business's legacy Monica 9 system, running the stack in Docker behind a Cloudflare Tunnel for secure remote access
- Migrated 500+ products into PostgreSQL via a structured import mapping and configured POS, multi-location inventory, and role-based permissions; scheduled for production cutover Fall 2026

TSA Helper | *Django, PostgreSQL, AWS S3, Heroku* Spring 2026

- Owned deployment and DevOps on a 5-person Agile team, shipping a Django student-organization platform (tasks, finance, documents, messaging) to Heroku with Unicorn, WhiteNoise, PostgreSQL, and AWS S3 media storage via django-storages
- Built a multi-channel messaging feature with emoji reactions, reply threading, pinned messages, and live autoscroll using custom Django models, templates, and JavaScript
